Exploring Our Brain

Balanced

Response

1 Read and write *A* (Amygdala) or *P* (Prefrontal Cortex) according to which part of the brain is in control in each picture.

Amyqdala

(impulse)

The **amygdala** gives impulsive and immediate responses, such as fear and anger. The **prefrontal cortex** helps us analyze our emotions and make good decisions.

efrontal

Cortex

(analysis and

decision)

Usually, the two parts work together. That is, we feel fear and anger, but we also try to control them.

Read and write A (Amygdala) or P (Prefrontal Cortex).

- 1. You get angry with a friend, and you say something bad.
- You get angry with a friend, but you are careful about what you say.
- 3. You are nervous about a presentation in class, but you do it anyway.
- 4. You are nervous about a presentation in class, and you can't speak.

How to Stay Calm

2 Listen and follow.

1 Circle the *wh*- words in the rhyme.

Who and what, when and where? Why and whose and how? These are the words you need to use When you want an answer now!

- Listen and say the rhyme. Identify two ways of pronouncing wh-.
- Put a piece of paper on your hand and say the *wh*- words from the rhyme.
 Which words make the paper move?
- 2 Match the *wh*-riddles to the pictures.

Big I am, but small I eat. What am !?

> With holes, I am whole. What am I?

Sounds Fun!

My Skills

1 Look at the pictures and discuss how the boy feels.

Jack was standing in front of his Grade 4 class. It was his turn to give a presentation. The topic was easy: *My Favorite Hobby*. Jack's favorite hobby was skateboarding. He had notes on why he liked skateboarding, when he started doing it and where he practiced. He was well prepared.

3

However, he felt anxious as he stood in front of the class. He opened his mouth, but no sounds came out. He felt hot. Then, he started shaking. His teacher, Ms. Davies, saw how uncomfortable he was.

"Don't worry, Jack," she said. "Go and sit down." "Have you ever given a presentation?" Jack's friend Emily asked as he returned to his seat.

"No, I haven't," Jack replied, "And I never want to again!"

For the next few weeks, Jack didn't speak in class. He paid attention, but he never asked questions or talked in front of a group. When Ms. Davies asked for volunteers, he just stared at his desk.

2 Read the story and complete the sentences. You can use one to three words. $\frac{\checkmark}{x}$

0. Jack's <u>favorite hobby</u> is skateboarding.

1. Jack _______ a presentation before.

- 2. Ms. Davies invited _______ to watch the Christmas play.
- 3. Ms. Davies asked Jack to ______ a tree.
- 4. Before the play, Jack realized he had never ______ in front of so many people.
- 5. After the play, Jack ______ join the drama club.

-con

Then, one day, Ms. Davies made an announcement. "It's time to start rehearsing for our Christmas play," she said. "Everyone will have a speaking part, and we will invite all of your families."

Jack was shocked. I can't act in front of all those people! he thought.

The play was *Robin Hood.* Jack was happy that he did not get any of the major roles. In fact, he didn't volunteer for any of the minor ones either. Eventually, Ms. Davies asked him to play a tree.

"Your only line is 'Whoosh!'" said Emily. "But you have to say it a few times and move with the wind!"

Jack wasn't so happy about that. "I will look ridiculous," he said, "and I'll get stage fright!"

"You will be in costume," Emily replied. "No one will know who you are."

That's true, Jack thought. Maybe this won't be so bad after all.

The big day arrived. Emily and Jack were backstage. Emily was in her Maid Marion costume and Jack was dressed as a tree.

"Have you memorized your lines?" Emily asked Jack. "Very funny," Jack replied. "Whoosh!" They both laughed. Then Jack looked out at the audience. The school gymnasium was full. "I've never spoken in front of so many people," he whispered to himself.

My Skills

When Jack was on stage, he looked at people's faces. They were having fun. *I've made things worse by not speaking in class*, he realized. *I'm even more nervous than I was before!*

He was thinking so much that he forgot his line, but luckily no one noticed.

"I have to face my fears," Jack said to Emily after the play. "So, I've decided to join the drama club to build up my self-confidence."

And in the following school year, that's what he did.

3 Read the story again and write the numbers to complete the sentences.

1. Jack felt anxious...

2. The tree's only line...

- ____ because he didn't speak in class.
- ____ you are too scared to go on stage.
- 3. Stage fright is when... when he tried to give a presentation.
- 4. Jack thinks his problem got worse... ____ in the play was "Whoosh!"

4 Describe how you feel when you speak in front of a group of people. Give reasons for your answer.

Hobbies and Climate Change

Since the 1950s, average global temperatures have increased by around 1°C. This has led to rising seas, habitat destruction and extreme weather. So why don't we take climate change more seriously?

Not enough snow

Winter Sun

It is winter vacation in the mountains of Colorado, in the United States, and hundreds of families are having fun in the snow.

"I love snowboarding!" says ten-year-old Karla. "I first tried it last year. I've been here for five days and I don't want to go home!"

But Karla is one of the lucky kids.

"We haven't seen any snow for most of the winter," says a ski instructor. "It has been too warm. Many kids come here to learn how to snowboard. They usually start lessons when they are seven."

When there wasn't any snow, he took visitors mountain biking and horseback riding in the hills. "It wasn't the same," he continues, "but we had to do something!"

king Tide

In Sydney, Australia, on the other side of the world, it is a Friday afternoon in the middle of the summer. School has finished and many children are running to the beach. Favorite hobbies include swimming, snorkeling and beach volleyball.

However, this Friday, people are shocked. One of the beaches is closed. Why? Because it has disappeared!

"The ocean has covered the beach because the water is higher than usual," says a local resident. "It's called a king tide. It happens a few times every spring, but this year, it has happened more often."

One possible solution is to build a sea wall to protect the beach from high seas. Unfortunately, that's too late for nine-year-old Sean.

"I really wanted to swim today, but it's too dangerous," he says. "We learned about climate change at school. There have been lots of storms this year. Maybe they are what caused this."

> As these examples show, climate change has real effects on people's personal lives and hobbies. Maybe now is the time to do something to stop it.

3 Read again and circle *T* (True) or *F* (False).

- 1. Extreme weather causes climate change.
- 2. Karla has been a snowboarder since she was seven.
- 3. A king tide is when water is higher than normal and covers the beach.
- Climate change has not affected people's free-time activities.
